

Straight Threaded Tubing-Connector

The firm flexible Tubing is widened is pushed over the integrated barbed side. It is fixed by knurled nut which presses a cutting ring to a sealing which forms a tightness for the connection. The shear force of the cutting ring intensifies the contact pressure. A solid, friction-locked, leak-tight and removable connection with low dead volume is the result. On the other side is a Male Thread that can be screwed in any fitting counter piece.
